

# An example of abstract for World Congress on Global Optimization 2019

Author Name 1<sup>1</sup> and Author Name 2<sup>2</sup>

<sup>1</sup> Institution 1,  
Address 1.  
*email\_author\_1@email.com*

<sup>2</sup> Institution 2,  
Address 2,  
*email\_author\_2@email.com*

**Abstract:** This text is a style example for abstracts of the World Congress on Global Optimization 2019, which must be written in L<sup>A</sup>T<sub>E</sub>X-format, not to exceed one A4-page.

The title and the list of author's must be placed between the brackets { } after the command `\newtitle` or `\newauthor`, respectively. For long title and long list, use `\\` to demand line breaking followed by `\medskip` to have a suitable skip. The author who will actually give the talk is marked by an underline (`\underline{ }`). The upper index after every author's name made by a number in the brackets { } after the command `\no` following the name is to indicate the corresponding address in the list at the end. To make this list, you have to use the command `\newaddress{ }` and the environment `itemize` with `\no{ }` in the bracket of `\item[ ]`. For instance, the list of addresses at the end of this text is written by

```
\newaddress{
  \begin{itemize}
    \item[\no{1}] Institution 1, \\
      Address 1.\\
      {\it email\_author\_1@email.com}
    \item[\no{2}] Institution 2, \\
      Address 2, \\
      {\it email\_author\_2@email.com}
  \end{itemize}
}
```

Please use `{\it ...}` for e-mail address.

The proper content of abstract starts with the command `\newabstract`. To begin a new paragraph just add a blank row in L<sup>A</sup>T<sub>E</sub>X-file without any skip command.
